10. According to the chart when you see “Caution” on a label, the product is ...

- A. more toxic
- B. less toxic
- C. extremely flammable

The chart is titled "Become a label reader" and provides a guide to interpreting hazard labels. It instructs users to look for key words on labels and choose the least hazardous product. The chart is organized into a table with four levels of hazard, from least to most toxic.

Become a label reader		
Look for key words on labels and choose the least hazardous product.		
Less toxic	Caution	mild/moderate
↑	Warning	moderate hazard
	Danger	extremely flammable, corrosive or highly toxic
	Poison	highly toxic
More toxic
